To all Interested Parties

RE: REACH

**Registration, Evaluation and Authorisation of Chemicals Regulations 1907/2006
(Including all amendments up to and including The REACH etc. (Amendment) Regulations
2021, referred to as the UK REACH Regulation).**

This declaration is issued by KMF Precision Sheet Metal Limited to provide customers with a statement on our position with respect to the REACH (Registration, Evaluation and Authorisation of Chemicals) Regulation 1907/2006, including UK REACH Regulation.

KMF (Precision Sheet Metal) Limited is not a manufacturer of substances as defined in the REACH regulations and therefore has no responsibilities for registration.

KMF Precision Sheet Metal Limited does not expect to have to register any substances itself on the grounds of importing from outside the EU, or of particular or confidential use.

KMF Precision Sheet Metal Limited is classed as a Downstream User and will comply with its obligations under the REACH regulations within this definition. As a result, we can confirm that all our suppliers have pre-registered our raw materials and subsequently will be registered between 2010 and 2027.

Also, we can confirm that none of our products contain substances of very high concern listed with the most recent candidate list (REACH SVHC - June 2026, UK Total: 224).

If you require any further information, please direct your enquiries to me using the contact details as provided with this letter.

Yours sincerely,

Mr Dan Jackson
Environmental, Health and Safety Officer
KMF Precision Sheet Metal Limited
